The actual underwriting fee per note will be equal to the selling concession provided to selected dealers, as described in this paragraph. Citigroup Global Markets Inc. will pay the Registered Representatives of Citigroup Global Markets Inc. a sales commission of \$20.00 from this underwriting fee for each note they sell. Selected dealers not affiliated with Citigroup Global Markets Inc. will receive a selling concession of up to \$20.00 for each note they sell. ## Risk Factors

*The following is a non-exhaustive list of certain key risk factors for investors in the notes. For further discussion of these and other risks, you should read the section entitled "Risk Factors" in the accompanying prospectus supplement. We also urge you to consult your investment, legal, tax, accounting and other advisers in connection with your investment in the notes.*

- **The notes may be redeemed at our option, which limits your ability to accrue interest over the full term of the notes.** We may redeem the notes, in whole and not in part, on any interest payment date beginning five years after the date of issuance of the notes upon not less than five business days' notice. In the event that we redeem the notes, you will receive the principal amount of your investment in the notes and any accrued and unpaid interest to but excluding the date on which the notes are redeemed. In this case, you will not have the opportunity to continue to accrue and be paid interest to the maturity date of the notes.
- **Market interest rates at a particular time will affect our decision to redeem the notes.** It is more likely that we will redeem the notes prior to their maturity date at a time when the interest rate on the notes is greater than that which we would pay on a comparable debt security of Citigroup Inc. with a maturity comparable to the remaining term of the notes. Consequently, if we redeem the notes prior to their maturity, you may not be able to invest in other securities with a similar level of risk that yield as much interest as the notes.
- **An investment in the notes may be more risky than an investment in notes with a shorter term.** The notes have a term of fifteen years, subject to our right to redeem the notes starting on February 15, 2018. By purchasing notes with a longer term, you will bear greater exposure to fluctuations in interest rates than if you purchased a note with a shorter term. In particular, you may be negatively affected if interest rates begin to rise, because the likelihood that we will redeem your notes will decrease and the interest rate on the notes may be less than the amount of interest you could earn on other investments with a similar level of risk available at such time. In addition, if you tried to sell your notes at such time, the value of your notes in any secondary market transaction would also be adversely affected.
- **The notes are subject to the credit risk of Citigroup Inc., and any actual or anticipated changes to its credit ratings or credit spreads may adversely affect the value of the notes.** You are subject to the credit risk of Citigroup Inc. If we default on our obligations, your investment would be at risk and you could lose some or all of your investment. As a result, the value of the notes will be affected by changes in the market's view of Citigroup Inc.'s creditworthiness. Any decline, or anticipated decline, in Citigroup Inc.'s credit ratings or increase, or anticipated increase, in the credit spreads charged by the market for taking Citigroup Inc. credit risk is likely to adversely affect the value of the notes.
- **The notes will not be listed on any securities exchange and you may not be able to sell the notes prior to maturity.** The notes will not be listed on any securities exchange. Therefore, there may be little or no secondary market for the notes. Citigroup Global Markets Inc. ("Citigroup Global Markets") intends to make a secondary market in relation to the notes and to provide an indicative bid price on a daily basis. Any indicative bid prices provided by Citigroup Global Markets shall be determined in Citigroup Global Markets' sole discretion, taking into account prevailing market conditions, and shall not be a representation by Citigroup Global Markets that any instrument can be purchased or sold at such prices (or at all). Notwithstanding the above, Citigroup Global Markets may suspend or terminate making a market and providing indicative bid prices without notice, at any time and for any reason. Consequently, there may be no market for the notes and investors should not assume that such a market will exist. Accordingly, an investor must be prepared to hold the notes until the maturity date. Where a market does exist, to the extent that an investor wants to sell the notes, the price may, or may not, be at a discount from the stated principal amount.
- **Secondary market sales of the notes may result in a loss of principal.** You will be entitled to receive at least the full stated principal amount of your notes, subject to the credit risk of Citigroup Inc., only if you hold the notes to maturity or redemption. Because the value of the notes may fluctuate, if you are able to sell your notes prior to maturity or redemption, you may receive less than the stated principal amount of the notes.
- **The inclusion of underwriting fees and projected profit from hedging in the issue price is likely to adversely affect secondary market prices.** Assuming no changes in market conditions or other relevant factors, the price, if any, at which Citigroup Global Markets may be willing to purchase the notes in secondary market transactions will likely be lower than the public offering price since the public offering price of the notes includes, and secondary market prices are likely to exclude, underwriting fees paid with respect to the notes, as well as the cost of hedging our obligations under the notes. The cost of hedging includes the projected profit that our affiliates may realize in consideration for assuming the risks inherent in managing the hedging transactions. The secondary market prices for the notes are also likely to be reduced by the costs of unwinding the related hedging transactions. Our affiliates may realize a profit from the expected hedging activity even if the value of the notes declines. In addition, any secondary market prices for the notes may differ from values determined by pricing models used by Citigroup Global Markets, as a result of dealer discounts, mark-ups or other transaction costs.
- **The price at which you will be able to sell your notes prior to maturity will depend on a number of factors and may be substantially less than the amount you originally invest.** A number of factors will influence the value of the notes in the secondary market and the price at which Citigroup Global Markets or any other potential buyer may be willing to purchase the notes in the secondary market, including: interest rates in the market and the volatility of those rates, the time remaining to maturity of the notes, hedging activities by our affiliates, fees and projected hedging fees, expectations about whether we are likely to redeem the notes and any actual or anticipated changes in the credit ratings, financial condition

and results of Citigroup Inc. As a result, the market value of the notes will vary and may be less than the issue price at any time prior to maturity or redemption, and sale of the notes prior to maturity or redemption may result in a loss.
